

### **Our Commitment to Australian Sovereignty**

i Momentum Services (IMS) is a 100% Australian-owned and operated PTY LTD enterprise. We provide a sovereign alternative to global consultancies, ensuring that technical leadership, strategic data, and project accountability remain firmly within Australian borders.

#### **Core Pillars of Our Sovereign Capability:**

- **100% Australian Ownership & Governance** As an onshore entity, IMS operates entirely under Australian Law and jurisdiction. Our leadership is locally based, providing our partners with direct access to decision-makers and ensuring our business interests are permanently aligned with Australia's national and economic security.
- **Data & Infrastructure Sovereignty** We understand the critical importance of data residency. IMS prioritizes AU-based technical talent and methodologies that safeguard sensitive infrastructure. By reducing reliance on off-shore delivery centers, we mitigate the risks associated with jurisdictional complexity and cross-border data exposure.
- **Principal-Led Local Expertise** Our "Boutique Advantage" means we deploy senior, AU-vetted specialists who understand the local regulatory environment—including ASD Essential Eight frameworks and APRA compliance. We bridge the gap between complex legacy systems and modern automation with a focus on building long-term domestic capability.

#### **Strategic Partnership**

By partnering with i Momentum Services, organizations are not only investing in elite technical execution but are also strengthening Australia's domestic technology ecosystem and sovereign resilience.
